General Part

Technical Assessment Body issuing the European Technical Assessment

Instytut Techniki Budowlanej

Trade name of the construction product

Eurofast Flat Roof Fasteners

Product family to which the construction product belongs

Fasteners for flexible roof waterproofing systems

Manufacturer

Van Roij Fasteners Europe B.V.
(EUROFAST / EUROFAST GROUP)
Indumastraat 18
5753 RJ Deurne
Netherlands

Manufacturing plants

Van Roij Fasteners Europe B.V. plants

This European Technical Assessment contains

320 pages including 21 Annexes which form an integral part of this Assessment

This European Technical Assessment is issued in accordance with regulation (EU) No 305/2011, on the basis of

European Assessment Document (EAD)
030351-00-0402 "Systems of mechanically fastened flexible roof waterproofing sheets"

This European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and shall be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may only be made with the written consent of the issuing Technical Assessment Body. Any partial reproduction has to be identified as such.

Specific Part

1 Technical description of the product

Eurofast Flat Roof Fasteners are mechanical fasteners comprise a screw, washer, washer with integral sleeve or linear washer. Screws are made of stainless steel or carbon steel protected by ceramic coating Eurofast Coat 15C or Eurofast Coat 30C. Washers (metal pressure plates) and linear washers (termination bars) are made of carbon steel protected by Aluzinc coating. Washers with integrated sleeve (pressure plates with tube) are made of plastic material: polyamide (PA) or polypropylene (PP) with addition of polyethylene (PE).

Eurofast Flat Roof Fasteners are shown in the Annexes to this European Technical Assessment.

The material properties, dimensions and tolerances not indicated in the Annexes shall correspond to the information laid down in the technical information to this European Technical Assessment.

2 Specification of the intended use in accordance with the applicable European Assessment Document (EAD)

Eurofast Flat Roof Fasteners are intended to be used for flexible roof waterproofing systems according to EAD 030351-00-0402. The possible substrates are steel or aluminum sheets, concrete, autoclaved aerated concrete, OSB/3 sheets, chipboards, plywood and timber. The plastic parts of the fasteners should not be exposed to UV and water.

The performance given in Section 3 is only valid if the fasteners are used in compliance with the specifications and conditions given in the Annexes.

The provisions made in this European Technical Assessment are based on an assumed working life of the products of 10 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer or Technical Assessment Body, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

Systems of mechanically fastened flexible roof waterproofing membrane according to EAD 030351-00-0402 should be covered by a separate ETA.

3 Performance of the product and references to the methods used for its assessment

3.1 Performance of the product

3.1.1 Safety and accessibility in use (BWR 4)

3.1.1.1 Fastener axial loads

Fastener axial loads are given in Annex A.1, A.2, B.1, B.2, C.1, C.2, D.1, D.2, E.1, E.2, F.1, G.1, G.2, H.1, H.2, I.1, I.2, J.1, J.2, K.1, K.2, L.1, L.2, M.1, N.1, N.2, O.1, O.2, P.1, R.1, S.1, T.1 and U.1.

3.1.1.2 Resistance to fastener unwinding

The fasteners are considered to be safe against unwinding. This was evaluated on the basis of the existing field experience of the manufacturer.

3.1.1.3 Mechanical resistance / brittleness of plastic elements

Plastic elements of fasteners are resistant to impact and brittleness, after impact of weight from drop height $\geq 1,0$ m.

3.1.1.4 Resistance to corrosion of metallic elements

All elements made of coated carbon steel, subjected to 15 cycles of action of a humid atmosphere containing 2,0 l SO₂ do not show more than 15% surface corrosion.

3.1.1.5 Mechanical resistance after heat ageing of plastic fasteners

Plastic elements, after heat ageing, are resistant to impact and brittleness, after impact of weight from drop height $\geq 1,0$ m.

3.2 Methods used for the assessment

The assessment has been made in accordance with EAD 030351-00-0402.

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

According to Decision 98/143/EC of the European Commission the system 2+ of assessment and verification of constancy of performance applies (see Annex V to regulation (EU) No 305/2011).

5 Technical details necessary for the implementation of the AVCP system, as provided in the applicable European Assessment Document (EAD)

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited in Instytut Techniki Budowlanej.

For type testing the results of the tests performed as part of the assessment for the European Technical Assessment shall be used unless there are changes in the production line or plant. In such cases the necessary type testing has to be agreed between Instytut Techniki Budowlanej and the notified body.

Timber, class \geq C24	$\rho_{min} = 350 \text{ kg/m}^3$	EN 338

Installation data:

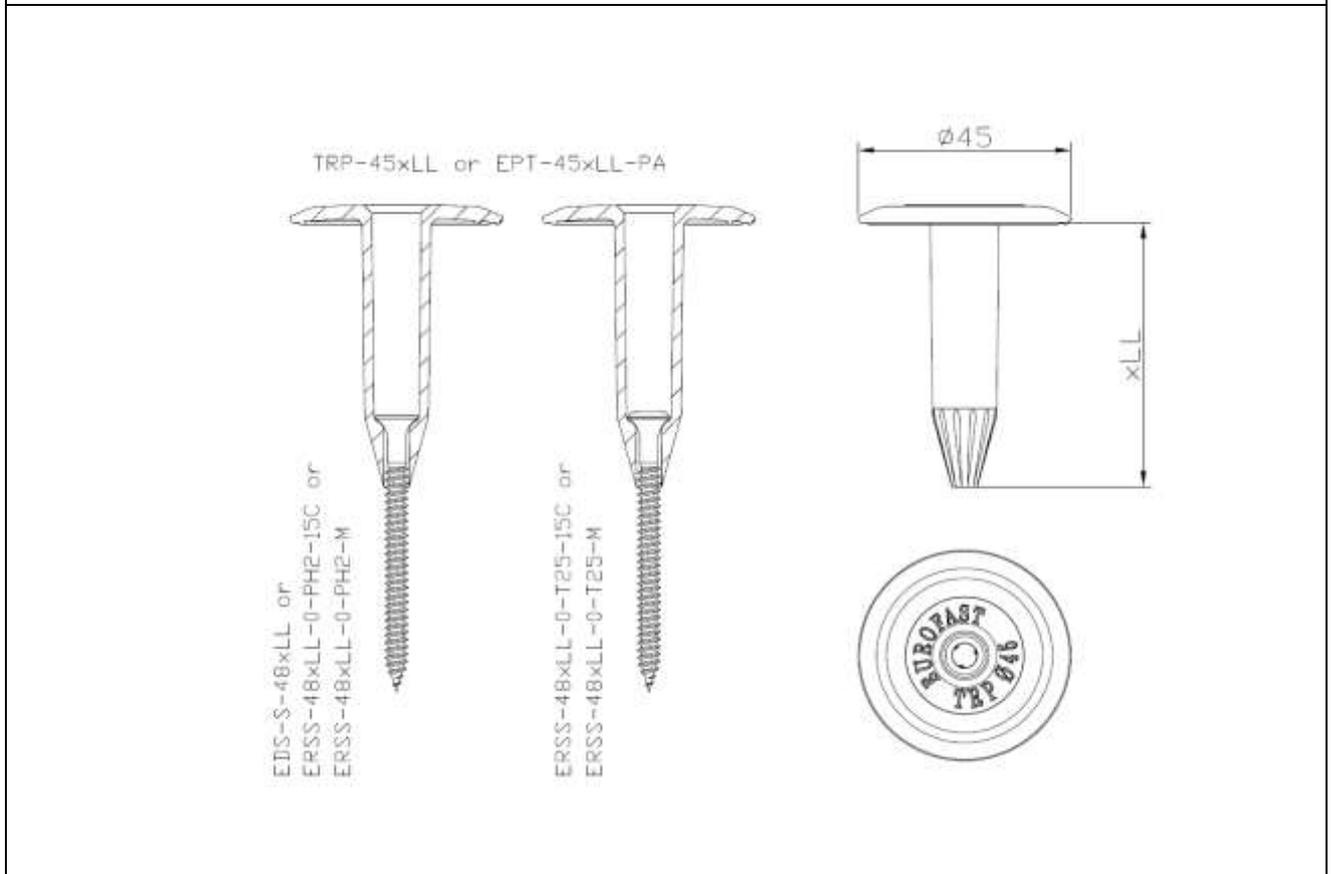

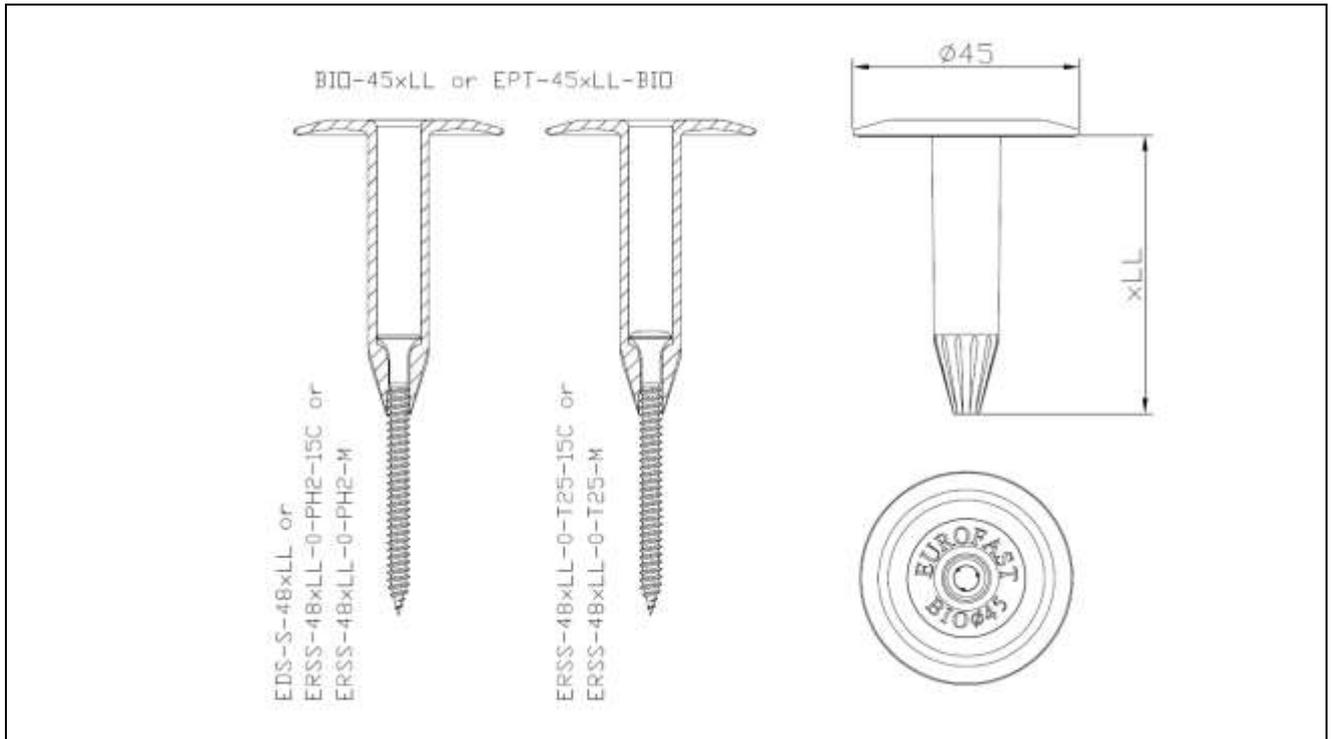

Max. drilling capacity in steel substrate:	0,88 mm
Head type:	Bugle Head / Raised Bugle Head
Recess:	PH2 / TX25
Fixing in steel substrate:	Min. 20 mm of the screw fixed through the steel sheet
Fixing in wooden and wood-based substrate:	Full thread through the substrate or minimum embedment depth
Installation force of installation tool in:	
- steel substrate	15 kg
- wooden and wood-based substrate	30 kg
Installation tool speed:	2000 - 2500 rpm

Timber, class \geq C24	$\rho_{min} = 350 \text{ kg/m}^3$	EN 338

Installation data:

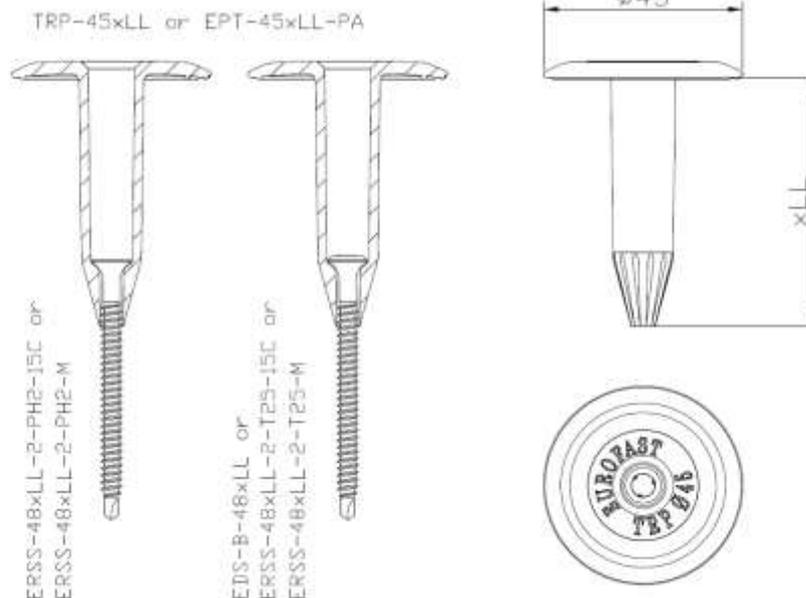

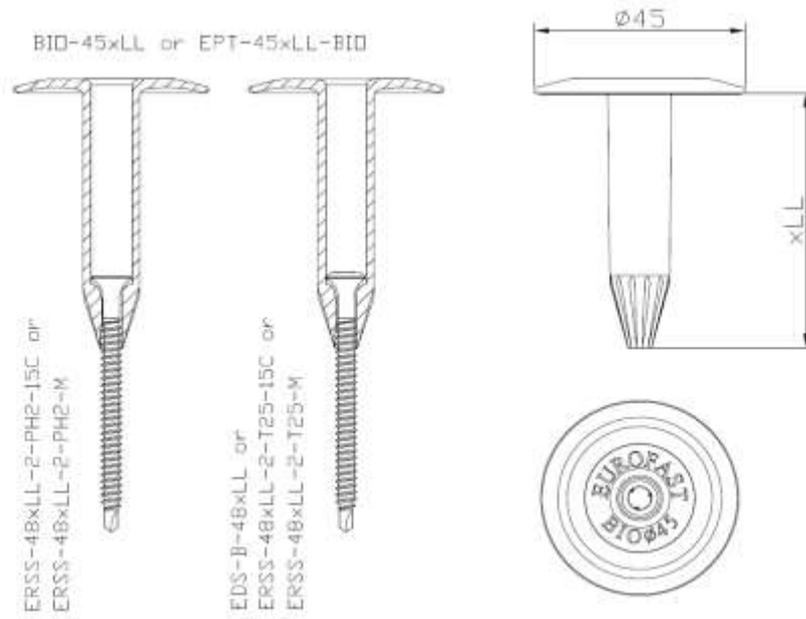

Max. drilling capacity in steel substrate:	2x1,25 mm
Head type:	Bugle Head / Raised Bugle Head
Recess:	PH2 / TX25
Fixing in steel substrate:	Min. 20 mm of the screw fixed through the steel sheet
Fixing in wooden and wood-based substrate:	Full thread through the substrate or minimum embedment depth
Installation force of installation tool in:	
- steel substrate	15 kg
- in wooden and wood-based substrate:	30 kg
Installation tool speed:	2000 - 2500 rpm

Installation data:

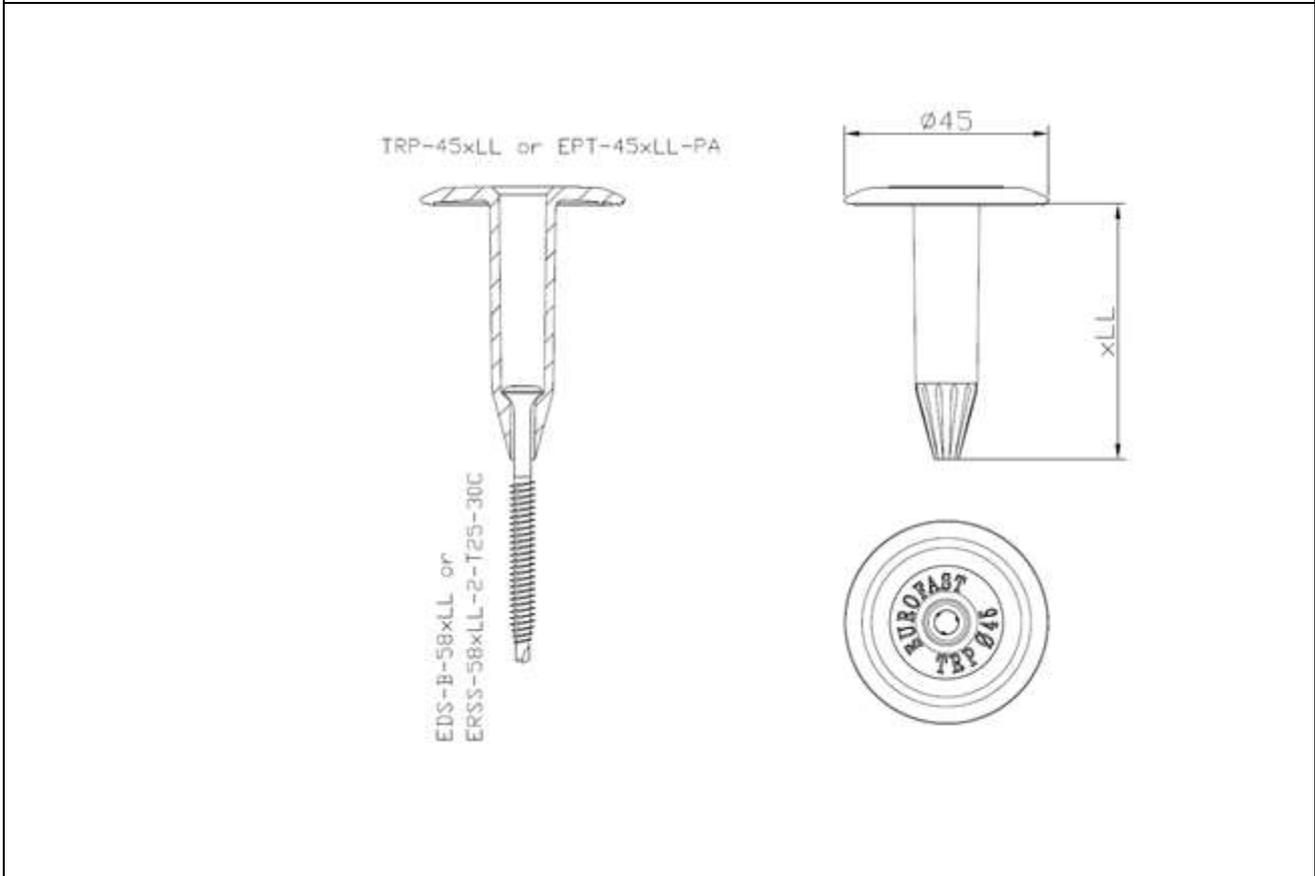

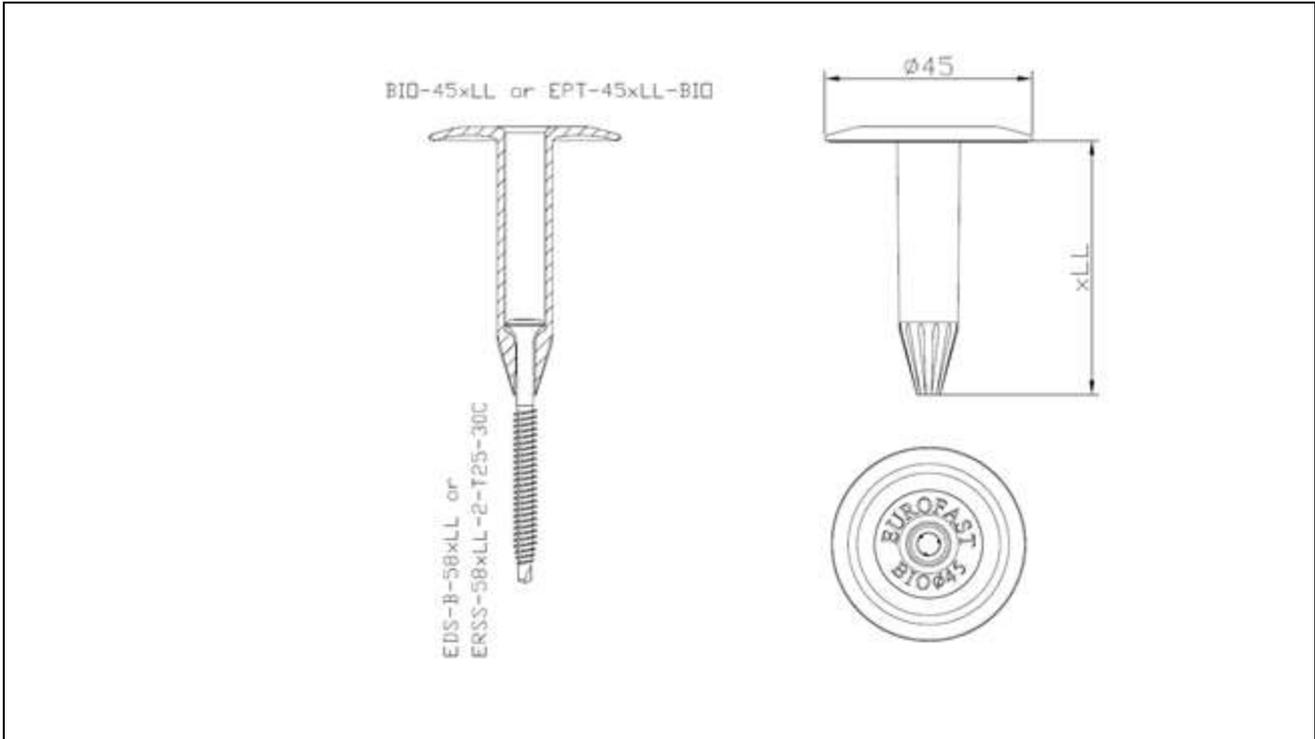

Max. drilling capacity in steel substrate:	2x1,25 mm
Head type:	Raised Bugle Head
Recess:	TX25
Fixing in steel substrate:	Min. 20 mm of the screw fixed through the steel sheet
Fixing in wooden and wood-based substrate:	Full thread through the substrate or minimum embedment depth
Installation force of installation tool in:	
- steel substrate	15 kg
- wooden and wood-based substrate:	30 kg
Installation tool speed:	2000 - 2500 rpm

Installation data:

Max. drilling capacity in steel substrate:	2x1,25 mm
Head type:	Hex Washer Head 8 mm
Screws EDS-BGTR-48xLL (ERSS-48xLL-2-HWH-B-C):	Collated screws for use with DEK-FIX tool
Fixing in steel substrate:	Min. 30 mm fixed through the steel sheet
Fixing in aluminium substrate:	Min. 30 mm fixed through the aluminium sheet
Fixing in wooden and wood-based substrate:	Full thread through the substrate or minimum embedment depth
Installation force of installation tool in:	
- steel and aluminium substrate	35 kg
- wooden and wood-based substrate	45 kg
Installation tool speed:	1600 -1800 rpm
Additional feature:	Safe thread
